Art Director: Cheryl
Designer/Developer: Amie
Site Topic: Oranges

Colors are a little darker than I would prefer, I want to communicate more vibrance and brightness of oranges
Maybe change sans serif body typeface
Can try alternate layouts other than splitting the page in half
Color palette shifts from home page to interior pages, no green on home page and no white on interior pages. Doesnt really bother me but can shift stuff to tie it together more
Black is kind of intense, can try white or another color
Break up text or have less text bc a huge chunk of body gets dense
Overall I like the website!
